

## **Fire properties of decorative and preservative oils for exotic wood treatment**

The objective of the project is to examine the combustible properties of exotic wood superficially treated with protective-decorative oils. The secondary goal of the project is to fit the appropriate type of oil depending on the wood species. This action will allow flammability reduction of the treated wood.

**Title of project: Fire properties of decorative and preservative oils on exotic wood**

**Support Program: Individual project – Poznan University of Life Science**

**Duration: 2010 – 2014**

**Responsible for project/Project leader/ Contact: dr. eng. Wojciech Grześkowiak
